Profile

Web developer who works inside marketing and automates it. Seven years of client websites, most recently custom WordPress, JavaScript and CSS at a marketing agency, where I also build automation with Claude Code and Python. I check performance, accessibility and SEO work by measuring it. BSc in Software Engineering and an MA in Content & Media Strategy.

Experience

Web Developer and Online Marketeer, marketing agency, Eindhoven Sep 2026 to now

- Build and maintain client websites on custom WordPress and WooCommerce: templates, custom fields, JavaScript components and multilingual content.
- Improve speed, accessibility and technical SEO from real measurements, using Chrome traces, site crawls and WCAG contrast checks.
- Use Claude Code every day. Built AI agents and automations for routine marketing work such as checks, drafts and reporting, with a person approving anything that goes out.
- Built a Chrome extension for reviewing website changes on the real page.
- Set up measurement so that changes can be checked against results later, and the lessons feed into the next round of work.
- Work directly from marketing briefs, and look after client marketing: technical SEO, conversion tracking and AI search visibility.

Co-founder, Build Up Addis (digital agency, remote) 2024 to now

- Sites for film, music and trade clients from brief to launch, on WordPress, Webflow and Shopify, with GA4 and on-page SEO. Automations in Make.com and n8n.

Co-founder and Content Lead, Digital Abyssinia Technologies 2019 to 2024

- Built and ran more than 20 client websites in WordPress and Elementor Pro for clients in film, music, law and healthcare.

Website and Digital Marketing, Barcon Getta, Ottawa (remote) 2021 to 2023

- Shopify design and maintenance, SEO, and conversion tracking through Google Tag Manager and HubSpot.

Projects

DutchMaster: Dutch learning app with AI chat, voice and a vocabulary trainer for the B1 exam. Next.js, TypeScript, Tailwind. **Recruitment pipeline:** Make.com scenario that scores CVs from Drive with an AI agent and logs to Sheets. **Housing finder:** Python watcher over nine rental sites with scoring and Telegram alerts. **Radar:** weekly AI and SEO trend briefs from trusted sources, tracked by what gets adopted. **Thuis:** native Android launcher I wrote for my Fire TV, in Java.

Skills

Front end: JavaScript, CSS, SCSS, HTML, TypeScript, React, Next.js, Tailwind. **Platforms:** WordPress (custom themes, ACF, must-use plugins), WooCommerce, Webflow, Shopify. **Quality:** Core Web Vitals, Chrome DevTools traces, WCAG, technical SEO, schema, multilingual sites, Playwright. **AI and automation:** Claude Code (building agents and subagents, skills, hooks, MCP servers), Obsidian, Claude API, Python, Make.com, n8n. **Data:** GA4, Search Console, GTM. **Design and delivery:** Figma, Git.

Education and languages

MA Content & Media Strategy, NHL Stenden, 2026. BSc Software Engineering. Claude Code in Action (Anthropic, 2026), Google Analytics GA4 certification.

Amharic (native), English (fluent), Dutch (B1, lessons ongoing).
