Profile

Web developer who works inside marketing and automates it. Seven years of client websites, most recently custom WordPress, JavaScript and CSS at JKC Media, where I also built the Claude Code and Python automation that runs our client marketing. I like owning a site end to end and knowing what each change did.

Experience

Web Developer and Online Marketeer, JKC Media, Eindhoven Sep 2026 to now

- Automated the repetitive side of client marketing with Claude Code. I built the desk, a Python and plain JavaScript tool of about 41,000 lines with 986 unit tests and 28 scheduled jobs, pulling Productive, GA4, Search Console, Google Ads, Meta and client mail together.
- Ten routines run on it: task upkeep, client watchers, ads and site checks, mail reading with reply drafts, redirects for dead pages, blog drafts, report drafts, backlink checks, timesheets and self-repair. 837 AI runs in two weeks, 819 successful. Agents have tool allowlists and token budgets and cannot contact clients, publish or touch budgets.
- Built a results loop: 561 logged changes are measured at 14, 28 and 56 days (252 with an outcome so far), and the lessons go into per-client Claude Code skills. About 50 skills, 15 machine-readable client prechecks, and my own CLIs for Productive, Google, HubSpot, Meta and SE Ranking.
- Built a 199-page destination system into a freight forwarder's custom WordPress theme: custom post type, ACF with code defaults, region hubs, 301s and a hand-written JavaScript route checker over 195 countries. A crawl of 266 URLs took over-long titles from 132 to 9 and replaced duplicate FAQs on 96 pages. The new hero measured CLS 0.00 in a mobile Chrome trace.
- Maintain a WooCommerce shop in five languages: scripted ACF edits with a byte-level check on untouched blocks, TranslatePress helpers, must-use plugins for hero preload, lazy video and cache purging.
- Accessibility and speed fixes: alt text and WCAG AA contrast (white on brand orange measured 3.06:1, proposed 5.2:1), brand logos cut from up to 681 KB to 6 to 32 KB after finding PNGs inside Figma SVG exports.
- Built JKC Tours, a Manifest V3 Chrome extension that walks stakeholders through changes on the real page, with a headless check on every step. 119 tours so far.
- Responsible for all client marketing since late October 2026: technical SEO, conversion tracking with GTM and Consent Mode v2, and monthly AI search measurement in AI Overviews, ChatGPT and Perplexity.

Co-founder, Build Up Addis (web studio, remote) 2024 to now

- Sites for film, music and trade clients from brief to launch, on WordPress, Webflow and Shopify, with GA4 and on-page SEO. Automations in Make.com and n8n.

Co-founder and Content Lead, Digital Abyssinia Technologies 2019 to 2024

- Built and ran more than 20 client websites in WordPress and Elementor Pro for clients in film, music, law and healthcare.

Website and Digital Marketing, Barcon Getta, Ottawa (remote) 2021 to 2023

- Shopify design and maintenance, SEO, and conversion tracking through Google Tag Manager and HubSpot.

Projects

DutchMaster: Dutch learning app with AI chat, voice and a vocabulary trainer for the B1 exam. Next.js, TypeScript, Tailwind. **Recruitment pipeline:** Make.com scenario that scores CVs from Drive with an AI agent and logs to Sheets. **Housing finder:** Python watcher over nine rental sites with scoring and Telegram alerts.

Skills

Front end: JavaScript, CSS, SCSS, HTML, TypeScript, React, Next.js, Tailwind. **Platforms:** WordPress (custom themes, ACF, must-use plugins), WooCommerce, Webflow, Shopify. **Quality:** Core Web Vitals, Chrome DevTools traces, WCAG, technical SEO, schema, multilingual sites, Playwright. **AI and automation:** Claude Code (skills, MCP servers, headless agents), Claude API, Python, Make.com, n8n. **Data:** GA4, Search Console, GTM. **Design and delivery:** Figma, Git.

Education and languages

MA Content & Media Strategy, NHL Stenden, 2026. BSc Software Engineering, Arba Minch University. Claude Code in Action (Anthropic, 2026), Google Analytics GA4 certification.

Amharic (native), English (fluent), Dutch (B1, lessons ongoing).
